**(54) PRIMER FOR POLYOLEFIN**

**(57)Abstract:**

**PROBLEM TO BE SOLVED:** To provide a primer for a polyolefin which forms a coating film excellent in adhesion to the polyolefin as a matter to be coated and to a neighboring topcoating film, and a coating method of a polyolefin molded article.

**SOLUTION:** The primer for the polyolefin comprises a graft copolymer (C) comprising the polyolefin (A) or a modified product thereof and an acrylic resin (B), where the ratio of the component (A) to the component (B) is such that the component (A) accounts for 5-50 wt% and the component (B) accounts for 50-95 wt%, each based on the total solid contents of the both components, and 50-95 wt% of the polymerizable unsaturated monomer components constituting the component (B) is comprised of at least one selected among cyclohexyl acrylate, cyclohexyl methacrylate, isobutyl acrylate, isobutyl methacrylate, n-butyl acrylate and n-butyl methacrylate, and the component (C) has a number-average molecular weight of 5,000-150,000 and a hydroxyl value of 5-100.
